

All About Austin

A web service project by Team Amber

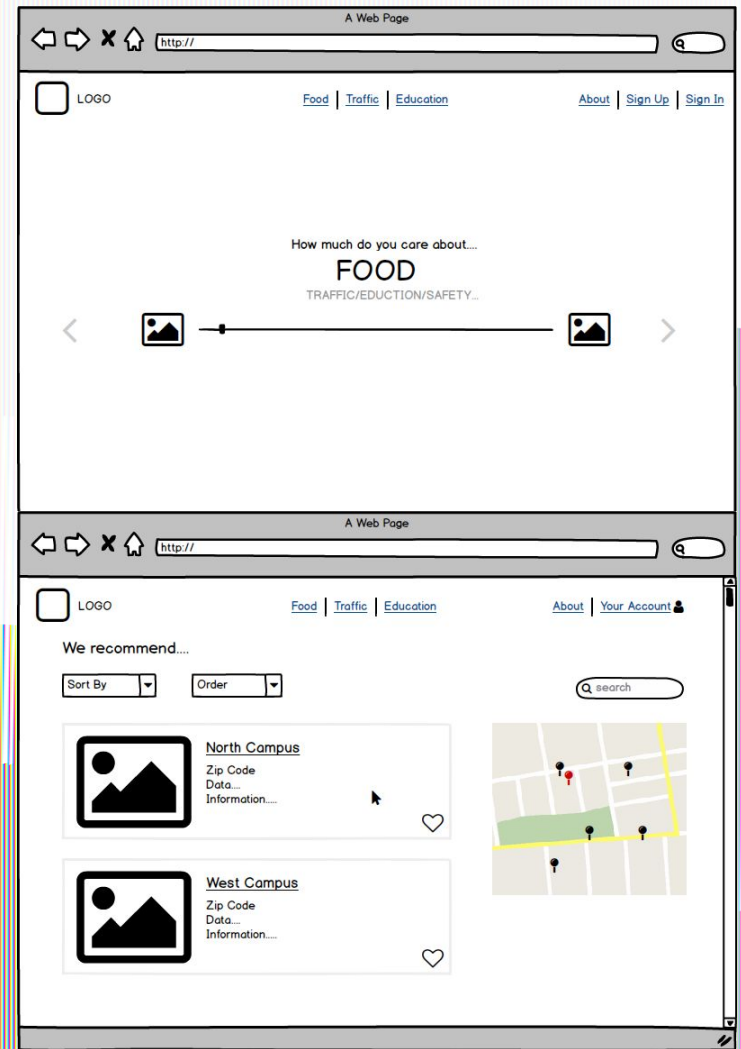

Vision

- Harvest and map data about Austin
- Examples of usage
- Alternative products
- Data Sources

Requirements:

- Multiple data sources (food, traffic, education)
- Interactive map
- Streamlined user interface
- Sorting and Searching function
- Save user favorites and preferences

Feasibility

- **Downloading data: independent of service availability, response time**
- **Database failure redundancy**
- **Difficulty of combining disparate data sets to yield a single ranking**
